Experience

Full Stack Software Engineer

100Devs Los Angeles, CA (remote) | October 2020 - Present

During my time at 100Devs I collaborated and problem-solved with a team of developers to build modern, responsive, and semantically structured web applications using best practices. I am also responsible for creating boilerplate code for students to build on during assignments. Additionally, I have mentored and supported students in the bootcamp to gain the knowledge and skills needed to succeed in the field, with things such as conducting code reviews, giving feedback on assignments, and leading weekly collaboration and Q&A sessions.

Tech Used:

➢ HTML	➢ Express	➢ React	➢ Git	➢ MongoDB
➢ CSS	➢ Javascript	➢ Node	➢ Github	

Full Stack Web Developer

Freelance Geneseo, IL | December 2019 - Present

I specialize in creating custom websites for small and medium businesses. With expertise in HTML, CSS, JavaScript, and other front-end technologies, I design and develop responsive and user-friendly websites tailored to the unique needs of each client. I have a deep understanding of web design principles and use modern tools and frameworks to deliver high-quality websites on time and within budget. My goal is to provide exceptional service to my clients and help them establish a strong online presence that sets them apart from their competitors.

Tech Used:

➢ HTML	➢ Express	➢ React	➢ Git	➢ MongoDB
